

INSTALLATION SUMMARY REPORT

EP: 49Tree / 0.2 Ha

DATE: MARCH 2018

CREW: R. White Woods – JP/JH

EQUIPMENT USED: Allegro Field PC, Vertex

1. **Access** (roads, trails, paths between plots): Good
2. **Weather conditions**: Variable: too windy at times, had to go to other site.
3. **Slope & aspect**: Mostly flat
4. **Vegetation** (major species, abundance): In 0.2Ha plots salal & salmonberry (heavy salmonberry in 0.2 Ha Plot 15), in 49Tree plots mostly moss.
5. **TP markers**: N.A
6. **Corners** (markers, labels): Metal corner posts all there
7. **Center posts** (presence, condition, identification tag): N.A
8. **Maintenance work done**: Re-freshed DBH lines, replaced some missing tags.
9. **Ingrowth** (presence, species): 2 ingrowth trees tagged in Fd49, 1 Cw, 1 Hw. Scattered undersize Cw and Hw present.
10. **Tags** (nails, straps): Nails, good, some pulled. Some tags replaced.
11. **Height visibility**: Mostly good, difficult in tight spaced Fd 0.2Ha, Plot 17.
12. **Plot condition**: Mostly good. Difficult access in 0.2 Plot 15 – lots of fallen stems and heavy salmonberry. Storm damage in some plots – several windthrown trees, most with signs of *Phellinus weirii* (DRL). Some tall skinny trees had their crowns significantly reduced, some killed by loss of branches due to storm damage
13. **Ambiguities**: ..
15. **Other information**: About 55% of Cw49, 20% of Hw49, and about 30% of Fd0.2 have been logged. Trees coded 1 6 (Residual, Cut stump)
