2003 Fire Season:
Plots 1-3 and 3-4 are right on the edge of the new R/W. No direct damage to these plots.
Plots 3-1 and 1-1 are control plots, which were relying on the adjacent buffer between the inner plot and the old R/W. This buffer has been completely removed in both cases, rendering these plots useless.
In the case of plot 1-1, a 2-meter strip of the inner plot, including dozens of test trees, has been destroyed.
