

## **INSTALLATION SUMMARY REPORT**

EP # : 987.04 Westwold

DATE: Oct

2018

CREW: R. White Woods Inc – J. Pelttari / J. Hepting / J. Cooney / D. Gustafson

EQUIPMENT USED: Allegro field pc / EasyDC, Vertex, d-tape

1. Access (roads, trails, paths between plots) 2wd access, then 400m hike in to plots. Difficult walking in some places due to fallen dead PI.
2. Weather conditions: A mixture - light snow, heavy rain, some clear days.
3. % slope & direction: Mostly flat, North
4. Vegetation (major species, abundance): Grass & light shrubs
5. TP markers: OK
6. Corners (markers, labels): OK, outside buffer corners all found, there are no inner plot corners
7. Center posts (presence, condition, identification tag): N/A
8. Maintenance work done: re-painted trails, refreshed DBH lines, replaced some tags.
9. Ingrowth (presence, species) Tagged 53 new Ingrowth trees, mostly Fd and Sx. Many Fd, Sx and some PI under the 7.5 cm minimum.
10. Tags (nails, straps): On zaps, replaced some.
11. Height visibility: Good
12. Plot condition: Mostly good - plots 4, 15 & 18 difficult to work in due to lots of dead/down PI.
13. Ambiguities:
14. Person days to complete:
15. Other information: The stem maps were fairly accurate and necessary – a nightmare to try and measure these plots without them.
