1	Photo around tower around tower and lasgest tree beside tower is 9.3 with live crown 4.8m from ground so 4.5m of live crown (This is to base of live crown not lowest live limb.)
2	Tower close up.
3	Tower from different angle.
4	Tower from trail tree 379 is just to right of tower in photo. Note: From the center of the tower the BA of aspen is 18 (9 tree & BAF 2)
5	Tree 379
6	Tree 379. Note: Scan just below below 1996 and tree forked in year 2000.
7	Close up of fork in year in year 2000 on tree 379.
8	Plot E11, herbicide 27.1m on one side by 21.5
9	Shooting from side of plot. Aspen is 9.8m out from edge of aspen when cut in June 2000.
10	Same.
11	Showing DBH 7.0 aspen stump from different angle.
12	Overview of plot.
13	Tree 374 on plot E11 blow down.
14	Very little movement along bottom edge. Maybe out 3m with suckers and very few.
