# TASS-ROTSIM

## MASTER INDEX

- **TASS-01.pdf** Progress Report: Incorporation of Phellinus Root Rot Impacts in the Tree and Stand Simulator (TASS)
- **TASS-02.pdf** Appendix to the Progress Report
- **TASS-03.pdf** Simulations of Thinning in Coastal Douglas-Fir Infected With Phellinus Root Rot
- **TASS-04.pdf** Appendix 1 Scatter Plots of Each Combination of Root Rot Severity Class, Initial Stocking Level, and Thinning Regime.
- **TASS-05.pdf** Appendix 2 Maps of Root Rot Distribution of Very Heavy Root Rot in Coastal Douglas-fir
- **TASS-06.pdf** Simulations of Stumping in Coastal Douglas-Fir Infected With Phellinus Root Rot
- **TASS-07.pdf** Simulations of Bridge Tree Removal in Coastal Douglas-Fir Infected With Phellinus Root Rot
- **TASS-08.pdf** Appendix Maps of Phellinus Root Rot Infection in Douglas-fir Stands Treated with Bridge-tree Removal
- **TASS-09.pdf** Simulations of Natural Tree Resistance in Coastal Douglas-Fir Infected With Phellinus Root Rot
- **TASS-10.pdf** Preliminary Stand Basal Area Estimates for Coastal Douglas-Fir Infected With Phellinus Root Rot
- **TASS-11.pdf** Comparison of Tass-Rotsim Versions 2.05.03 And 2.05.09
- **TASS-12.pdf** Effects Of Armillaria Root Rot in Thinned and Unthinned Coastal Douglas-Fir Stands.
- **TASS-13.pdf** Effects Of Armillaria Root Rot in Thinned and Unthinned Coastal Douglas-Fir Stands. (Plots Thinned to 500 trees/ha)
- **TASS-14.pdf** Effects Of Armillaria Root Rot in Thinned and Unthinned Coastal Douglas-Fir Stands. (Plots Thinned to 1000 trees/ha)
