

FSP Tracking System Newsletter

June 8, 2010

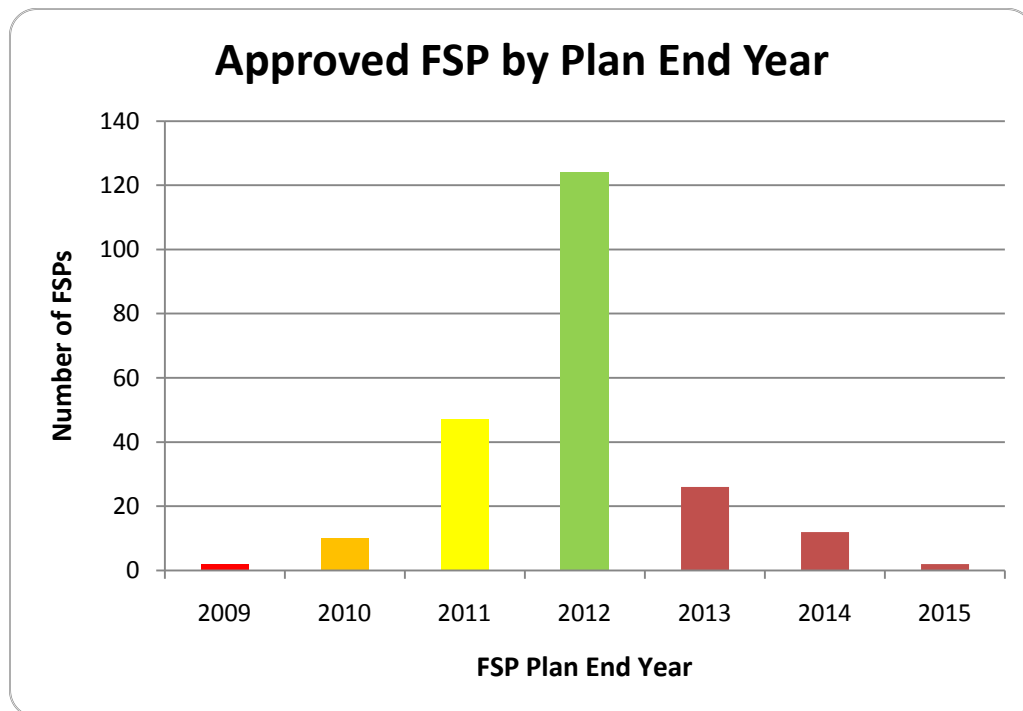

Newsletters are posted at <http://www.for.gov.bc.ca/his/fsp/communiques.htm>.
Please share with your colleagues who use the FSPTS.

1. Introduction

The purpose of this issue of the FSPTS Newsletter is to pass on information regarding upcoming FSP expiries. If you have suggestions for future issues, comments on this or past issues, or changes to the mailing list (subscribe or unsubscribe), please forward to Del.Williams@gov.bc.ca.

2. FSP Expiries

Most of the current FSP's were created three to four years ago and have five-year terms, so many will be expiring within the next year or two. The chart below shows the upcoming wave of expiries. To help with planning the workload associated with these expiries, we have produced a report indicating expiry date, district, holder etc.

This report is available at <http://www.for.gov.bc.ca/his/fsp/business.htm> and entitled “Provincial FSP’s” on the list of FSP Business and Policy Documentation.

Holders of expiring FSP’s will have options that include extending the current FSP or producing a new one. Further information is available at:

- Guidance on FSP extensions was discussed in the March newsletter available at <http://www.for.gov.bc.ca/his/fsp/communiques.htm>.
- Information on extending or creating new FSP’s can be found in the Administrative Guide to FSP’s (<http://www.for.gov.bc.ca/hth/timten/AGFSP/index.htm>).
- A new bulletin on extensions entitled *An Overview of FSP Extensions* is available at: http://www.for.gov.bc.ca/hth/timten/FRPA_implementation/Documentation/FRPA%20General%20Bulletin%2022%20-%20Overview%20of%20FSP%20Extensions.pdf
