

FSP Tracking System Newsletter

Oct 25, 2010

Newsletters are posted at <http://www.for.gov.bc.ca/his/fsp/communiques.htm>. Please share with industry and government colleagues who may have an interest in the FSPTS.

1. Introduction

This issue is mainly about an upcoming release of the FSPTS. There is also some information on FSPTS access and on the WebADE selector.

If you have suggestions for future issues or comment on this one, please let me know. As well, if you want off the mailing list or have additions to the mailing list, email me at the address shown at the bottom of the newsletter.

2. New Release

We are currently using version 1.4 of the FSPTS and a new release (Version 1.5) is in the works. The primary purpose of this release is to add FSP extension capability to the FSPTS. The extension capability will create a simple way to extend the term of FSP's from within the system and will clearly define the extension as a different event than an amendment. The planned completion date is January 2011.

For those of you that are doing or processing extensions, continue to follow the manual process outlined in Newsletter #1. To date, there have been 6 extensions, and I know there are several more FSP's due to expire in the next few months.

Another change coming with version 1.5 is the creation of a new role. We currently have the following roles:

Role	Authorised Actions
FSP Viewing	Allows General Inquiry mode.
FSP Submitter	Typically a forest industry company, holder of a major forest license who submits FSPs.
FSP Reviewer	An MFR District staff member who will review the FSP content
FSP Decision Maker	Typically the MFR District Manager, who will approve or reject the FSP.
FSP View All	Provides the ability for licensees to search for and read all approved FSPs. Does not permit modification of data

We are creating a "District Submitter" role that will provide the ability to submit data for any licensee in the district. This role is being created to address a frustration frequently experienced by some district staff (particularly geomatics staff) who must apply for a separate "FSP Submitter" role for each licensee that they happen to submit a document for.

3. FSPTS Access for MFR Staff

We frequently get requests for *View All* access to the system by MFR staff. All MFR staff automatically have this role. If different levels of access are required, go to <http://www.for.gov.bc.ca/his/fsp/access.htm> and fill out the web form.

As the name implies, “FSP View All” allows access to information stored on all FSP’s including information in the *Supporting Documents* section. It should be noted that licensee users with “FSP View All” access can only view supporting documents for their own FSP’s. Any documents placed in the Supporting Documents section can only be seen by MFR staff or the holders of the FSP.

You can check your FSPTS access roles – or roles in any MFR system – by going to the ADAM website: <https://apps14.for.gov.bc.ca/adam/welcome.do>.

4. WebADE Selector

For those of you with access roles for more than one organization, you will be prompted with this dialogue box when you open the FSPTS:

Most MFR staff will have an HTH Tenures Branch role (this would be your View All access) and perhaps a reviewer role for their district or submitter roles for licensees. Make sure that you sign in with the organization that you are representing. If you need to change roles, remember to sign out of the FSPTS and shut down the browser before re-entering the FSPTS. If you do not shut down the browser, it will take you back into the system in your previous role.

You can check your roles by going to the ADAM site as noted in part 3 of this newsletter.

WebADE Organization Selector

We have detected that you have the ability to act on behalf of multiple organizations.

From this screen you can choose which organization you are going to do work on behalf of for this session. Once you have selected an organization from the list, choose "Continue" and you will be acting on behalf of that organization for the entire session. In order to change to another organization, simply close the browser and restart your session with this application and you will be prompted with this dialog again.

HTH - RESOURCE TENURES BRANCH

Set as Default: ☒

Continue

5. Next Issue

In the next issue, expect progress reports on release 1.5 and news on contracted support.
