Target Audience

- Who is this module targeted at?
 - Major Licensees and their consultants, who are interested in applying FSP SSIDs to openings previously subject to transition FDP and/or Silviculture Prescription stocking standards
 - Ministry of Forests and Range District staff as well as Compliance and Enforcement staff interested in how the provisions to apply FSP SSIDs function in the RESULTS application.
- Who is this module not targeted at?
 - Woodlot licensees and their consultants. Since woodlot licensees don't have FSPs this section of legislation is not applicable
 - FFT Recipient Agreement Holders and their consultants. Since FFT RAH don't have FSPs this section of legislation is not applicable

FRPA s 197 and RESULTS

Forest and Range Practices Act Section 197 as it relates to RESULTS:

- Provides a mechanism whereby Stocking Standards approved in a Forest Stewardship Plan (FSP) can be applied to openings previously managed under FDP site plans and/or silviculture prescriptions.
- FSP must have provisions that allow for this to occur
- Ultimately FRPA s197 allows licenses to added FSP Stocking Standards (FSP SSIDs) to openings without any additional approvals from MFR

FRPA 197- 5

FSPTS

- Key to utilizing FRPA 197 functionality in RESULTS is that the Forest Stewardship Tracking System (FSPTS) has the FRPA 197 Election for Stocking Standards option checked off
 - This can be done via FSP XML Submission, or

```

<?xml version="1.0" encoding="UTF-8" standalone="yes">
  <fsp xmlns="http://www.mfr.ca/fsp" xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance" xsi:schemaLocation="http://www.mfr.ca/fsp http://www.mfr.ca/fsp/fsp.xsd">

      <fspHeaderVersion>2.0.10-04-10</fspHeaderVersion>
    </fspHeader>
    <fspBody>
      <fspBodyElectionForStockingStandards>
        <fspBodyElectionForStockingStandardsCheckedOff>true</fspBodyElectionForStockingStandardsCheckedOff>
      </fspBodyElectionForStockingStandards>
    </fspBody>
  </fsp>

```

Key Notes

- Applying FSP SSIDs is done on an SU by SU basis, thus, not all SUs have to have FSP SSIDs applied to them. This may create an opening that has a mix of SUs with and without FSP SSIDs
- There is no approval from the MFR District required to enact this functionality in RESULTS (approval has already been granted during the FSP approval)
- If the FRPA 197 Election checkbox is unchecked in the Forest Stewardship Tracking System (FSPS) your amendment will be rejected

 RESULTS Training FRPA s.197 Training	<h2>Key Notes</h2>
<ul style="list-style-type: none"> • If you apply an FSP SSID to an SU where either the Regen Delay date, or the late Free Growing date is past due, the current RG or FG offset will be replaced with the FSP SSID offset, and a new RG/FG date will be generated based on the FSP SSID offset • If you apply an FSP SSID to an SU where the Regen Milestone has already been achieved, the Regen Delay offset will be ignored during the process, and the milestone declaration will be unaffected • If you apply an FSP SSID to an SU where the FG Milestone has already been achieved, the amendment will not be completed. That is, you can't amend an SU that has been declared FG.
