RESULTS Corporate Reporting System:
New Modifications to Standards Units Detailed Report & Data Download Reports - Date Options Fixed

1. Modifications to Standards Unit Detailed Report

A new CRS report is available which shows all SU data elements changed under SU modification events tracked under S310 SU History. The report replicates the data found on S314 Stocking Standard History Details that shows full extent of entire opening's individual SU's data element changes by comparing the most recent changes against the last version. Most recent changes are bracketed and italised. This report is available in a .pdf and .csv format. Note that any SU modifications tracked through SU History effective as of March 11, 2008 are displayed in this report.

The report can be found under Standards and Approvals report category.

The parameter screens have been defaulted to: Opening Category FTSBF, Event Type Code: Section 197. This is to ensure users make deliberate changes the report parameter specifications as needed rather defaulting to an "ALL" category. This report can generate massive amounts of pages reflecting multiple opening and its SU modification events. The **Event Date range is mandatory to limit scope of the report.** This report is most useful if you are specific with the request so you are not overwhelmed by too much information.
