Background

This document is meant as a companion document to LearnLinc RESULTS training on Amendments and Declarations. It was originally created to provide guidance for RESULTS version 1.3.5 and has been updated to take into account modifications to date. The material is somewhat time sensitive as the Forest and Range Practices Act will enable changes to the administration of stocking standards that could affect the amendment process. The materials here are based on the present situation and do not cover potential changes brought about by FRPA.

Steps for updating an opening:

Updating is meant to allow minor changes in the RESULTS database to correct or update incorrect or out of date information. If information is deemed inaccurate an update may be the route to take. If the issue is spatial or has to do with modification of a standard, an amendment may be required. What follows are the steps to update an opening.

To begin, Log onto RESULTS, the following screen will appear. You will need to have the appropriate ID and authorization (RESULTS Update for minor changes, RESULTS Declaration or Approval for those activities). See <http://www.for.gov.bc.ca/his/results> on how to obtain access. See also the Quick Reference Card in Appendix 1 for tips on Navigating Results.

Select the opening that requires updating by:

Choose the **Openings** tab in the drop down menu choose **Opening Inquiry**

To bring up the block information you will need to use as a minimum one of:

- Opening (map sheet and unique opening number);
- Opening ID (unique opening number provided by the system);
- Timber Mark / Cut Block;
- Licensee Opening ID / Client Number/Location; or
- Licence No / CP / Cut Block.

If the information entered is found the associated **RESULTS301 – Opening Inquiry** screen will appear with basic administrative and previous stand information.

Note – the proper Org Unit must be in place for the block information to be found.

If known to be incorrect, certain fields can be updated without going through an amendment procedure or without resubmitting through the Electronic Submission Framework (ESF), that is fields that have no spatial impact (they are found within boxes). To update, simply place the cursor in the box to be modified and make the changes. Once all of the changes have been made and visually checked over, press the **Save** button found at the bottom of the screen. You will not see any obvious changes to the fields that you modified other than they now have the new updated information within the boxes. Once saved the screen will return to the top and you will note that the status of the block did not change from APP or Approved status.

http://testextranet5.for.gov.bc.ca - Stocking Standards - Microsoft Internet Exp...

Stocking Standards (RESULTS310)

Use: This screen is used to view stocking requirement data, ecology and layer information for a given standard unit in the opening.

Outcome: RESULTS310 allows you to update stocking standards.

How To:

View Stocking Standards

- Enter one of:
 - Opening
 - Opening ID
 - Timber Mark/Cut Block
 - Licensee Opening ID/Client Number/Location or
 - Licence No/CP/Cut Block
- Click the Go button in the header area. The results will be displayed at the bottom of the screen.

Update a Standard Unit

- Recall a record, using the inquiry method above.
- Navigate to the desired standard unit.
- Make the desired changes. Changes can be saved for the following:
 - Standard Unit
 - Net Area To Be Reforested
 - BGC information
 - Site Series and Type
 - Standards ID (if the Approved Date is earlier then December 17, 2002 or if the Regen date is before the current year and month)

Internet

Remember to use your **Help** LINK found on the top right of the various RESULTS screens. Each time **Help** is chosen it will provide an overview of the Use, Outcome expected and How to create the outcome. The above example is for the outcome of updating stocking standards.

At the bottom of each **Help** display is a copy of the RESULTS screen with [hypertext](#) links to definitions or explanations for each field. For example Disturbance Gross Area.

Disturbance Gross Area

What is it... Display field only.

The disturbance gross area is the gross area inside the marked boundary of the cut block that has been disturbed by harvesting. It includes the Net Area to be Reforested, road, wildlife tree patches and other created non-productive areas (landings, gravel pits).

Why is it important... The disturbed areas will have associated obligations.

To Print: 1. Right click on the page or pop-up; 2. Click on Print

For further information see the web based tutorial at:

http://www.for.gov.bc.ca/his/results/tutorial/htm/openings/op_amintro.htm

The following is an example from that tutorial:

Minor Changes

Once you locate your opening in RESULTS, you can make some minor changes to the information on the main screen without having to make an actual amendment request. The fields you can make these changes to will depend on your security level, but may include:

- Opening category
- Previous stand type (timber stand)
- Biogeoclimatic information
- Maximum soil disturbance percentage
- Comments

 If you are not making minor changes or requesting an amendment, click on the **Data Submission** tab to quickly access ESF and upload other changes.

This information can only be altered by licensees who hold the opening and have the proper security privileges.

How?

Checklist For Making Minor Changes

[Step 1 - Locate The Opening](#)

[Step 2 - Update The Information And Save](#)

If all else fails and you still need help, email your question to

Steps for Amending Standards in an opening¹:

For blocks that were harvested under the authority of a Silviculture Prescription there is presently a requirement to go through an amendment process for modifying stocking standards. The process on line is as follows:

¹ Amendments are required for blocks harvested under Silviculture Prescriptions. Blocks harvested under Site Plans do not require amendments to the stocking standards if approved regimes suited to the SU situation and circumstances are used.

To bring up the block information you will need to use as a minimum one of: Opening; Opening ID; Timber Mark/Cut Block; Licensee Opening ID/Client Number/Location; or Licence No / CP / Cut Block.

If the information entered is found the associated **RESULTS310 – Stocking Standards** screen will appear with basic administrative and previous stand information in the fields below. Remember your Org Unit must be appropriate for the associated block.

Where an amendment to a stocking standard is desired due to modified circumstances an amendment may be requested. Amendments requests are reviewed by the District Manager to ensure the standards meet the intent of higher level plans and general sustainability objectives.

To request an amendment simply click on the **Amendment Request** button found at the bottom of the screen as shown above.

Note there is also a button available for **Update** – used for updates and for Approved Variations of Regimes within Forest Stewardship Plans.

RESULTS312 - Stocking Standard Amendment Request

1 of 1

For this example you wish to amend the SU to add another Preferred species and reduce the minimum intertree distance to address an issue of higher water tables due to beaver damming. For example, BI was considered as an Acceptable species in the original Silviculture Prescription and is now being proposed as Preferred with a change of the minimum intertree distance from 1.2 to 1.0 m. Changes must be made section-by-section and SAVED by section. If a change is made in one section, for example the MITD is modified but not saved prior to moving on to the species section, the modified information will not be saved. Therefore for this example the first step is to change the MITD from 1.2 to 1.0 and choose **Save**.

RESULTS						
Search	Inbox	Openings	Data Submission	Admin	Event Tracking	Reports
Single Layer 4 - Regen Layer 3 - Sapling Layer 2 - Pole Layer 1 - Mature						
		Well Spaced Trees / ha	Residual Basal Area (m ² /ha)	Post Spacing Density (st/ha)		
Target:		<input type="text" value="700"/>				
Min Horiz (m):		<input type="text" value="1"/>				
Min Pref:		<input type="text" value="300"/>				
Min:		<input type="text" value="400"/>	<input type="text" value="0"/>	<input type="text" value="500"/>		
Max:				<input type="text" value="1600"/>		
Max Coniferous (st/ha):		<input type="text" value="10000"/>				
Height Relative to Comp(cm%):		<input type="text" value="125"/>	%	<input type="button" value="Save"/>	<input type="button" value="Cancel"/>	<input type="button" value="Delete"/>

The modified field now has a **RED** background.

Step 2. When elevating a species from Acceptable to Preferred you must first delete it from acceptable as it can not be both acceptable and preferred at the same time for the same SU.

Delete BI from the Acceptable list, once deleted it does not show up on the screen (the deletion is found in the History record with BL in the Old column and nothing in the New column, you will see that there is a row for preferred (or not), in your case it will read N. You then choose BI in the drop down list for preferred, you will also have to add in the appropriate minimum height. The new species and height are shown as **RED text**.

RESULTS

You will then see what changes have been made, when and by whom. Use the [Back](#) button twice to get back to the [RESULTS312 – Stocking Amendment Request](#) screen. At this time you may notice that you did not provide a rationale, this should be provided as a rationale will help the statutory decision maker when deciding on approving or rejecting the request.

Amendment Rationale

This Standards Unit has been partially flooded due to Beaver activity in the nearby stream. Natural BI is found on site. It was previously considered an Acceptable species. The BI on site are doing well and due to its tolerance of flooding we request the status of BI be modified to Preferred. To address the variability of good growing sites we request an amendment to the MITD from 1.2 to 1.0 m. We have also attached a pdf file with photographs of the block for your consideration.

Remember to Save as you go. The **Save successful** reminder will appear at the top of the screen after saving.

• Save successful.

RESULTS312 - Stocking Standard Amendment Request

1 of 1

Back

History

Once you are satisfied that you have made the desired changes and rationale it is time to submit the amendment. To do this you use the Back button once, this takes you to **RESULTS 310 Stocking Standards screen**. At the bottom of the screen you will find the **Submit Amendment** request button. Click on it to submit.

Update Amendment Request Submit Amendment

You will note that the **RESULTS310 - Stocking Standards** screen does not yet show the proposed changes, if approved it will.

On the top right portion of the **RESULTS310** screen there is a new hyperlink **Amendment Proposed**, if that is chosen it takes you back to the **RESULTS 312** screen that shows the highlighted changes and rationale. Once the changes have been submitted, you will get a Save successful message. The Submit Amendment button will be deactivated.

Attachments

To provide an attachment choose **Attachments** from the TAB section. Any form of file can be attached, but the smaller the file the faster it will up and downloaded. Attach your map here showing the changes made (pdf versions work well). This map will replace the paper copy formerly provided and will be used as a reference for the amended areas. In some cases text or photos may be attached. To limit file size photos can be pasted into

Word files and saved as pdf files (depending upon the version of Acrobat, save the file as either as screen optimized or choose reduced file size in later versions).

Once saved the above screen **RESULTS401 – Attachments**, indicates the file name and a description of the file. The description is a necessary field. You have three options with the file, , which allows you to modify the description, , which allows deletion of the file and description and opens the file. You can then save it to a location that you can readily relocate.

To submit the amendment return to the **RESULTS310 - Stocking Standards** screen (back on from the Attachment screen). Choose Submit Amendment at the bottom of the screen.

Once the Submit Amendment button is clicked the amendment has been submitted. Save Successful will be shown at the top and the status will be changed to SUB.

- **Save successful.**

Org Unit: ▼

Status:

SUB

The MoF is now responsible for reviewing the submission and either accepting or rejecting it. The next section goes over the steps the MoF follow in this procedure.

HELP! Additional Help information can be found by choosing the Help tab on the top right hand corner of the RESULTS screen. The example below is from RESULTS401 - Attachments screen.

For further information see the web based tutorial at:

http://www.for.gov.bc.ca/his/results/tutorial/htm/openings/op_amtips.htm

Some tips from that site:

Tips & Troubleshooting

To save time later, consider using these tips and suggestions:

Tips

- When putting together your amendment request, remember that you must click the **Save** button in each section you make changes to! You can always tell if you saved a section, because the requested changes are highlighted for easy reference: new items appear in red text, and changed fields have white text on a red background.
- Most of the tabs in the RESULTS application take you to a screen that displays administrative information. Some of the fields will be automatically populated with your information based on security privileges. By adding in additional information, you can run a query that allows you to complete your task. This is exactly what you do to bring up the opening you want through **Opening Inquiry** in order to make minor changes.
- To save time, double-check everything before clicking the **Submit** button to send the amendment request. If you happened to make an error, you will have to wait for that request to be approved or rejected; you cannot request another amendment for that opening while you already have one submitted.
- Be sure to check whether your stocking standard amendment request has **single** or **multiple** layers. If it has multiple layers, you will need to make those additional entries by opening up the layers tabs.

REMEMBER If all else fails and you still need help, email your question to

MoF Approval Procedure.

Approval for Amendment requests on Silviculture Prescription blocks is made by the District Manager.

Note that changes to Standards Units for blocks harvested under Site Plans, changes to approved Silviculture Regimes suited to the situation and circumstance of the SU can be made without going through the amendment process.

The following outlines the steps taken to locate and assess the proposed amendment.

To begin, Log onto RESULTS, the following screen will appear (note the version will be a production not a test version as shown here).

The screenshot shows the RESULTS System Home Page. At the top, there is a green header bar with "Application Home" on the left and "Help" on the right. Below this is a dark green bar with the word "RESULTS" in white. Underneath is a navigation bar with tabs: Search, Inbox, Openings, Data Submission, Admin, Event Tracking, and Reports. The main content area has a white background. At the top of this area, it displays "UserName: FSIAS RES_MTI", "Environment: TEST", and "Version: 1.4.0". Below this is a large "Welcome to the RESULTS System" message in red text, with a large "W" in the background. To the left of the message is the British Columbia Forest Service logo. Below the logo is the date "2004-11-29". The message text reads: "RESULTS(Reporting Silviculture Updates and Landstatus Tracking System) is a web-based application that provides clients and government staff direct on-line access to Provincial spatially enabled silviculture information. RESULTS will track and report silviculture accomplishments, administer approved stocking standards and evaluate free-growing progress on obligations." At the bottom of the page is a black footer bar with "Feedback", "Disclaimer", "Privacy", and "Copyright" on the left, and "MINISTRY OF FORESTS" on the right.

Go to the **Inbox** tab, from the drop down menu select **Inbox Search** this will bring up the RESULTS201 – Inbox Search screen.

The screenshot shows the RESULTS201 - Inbox Search screen. At the top, there is a green header bar with "Application Home" on the left and "Help" on the right. Below this is a dark green bar with the word "RESULTS" in white. Underneath is a navigation bar with tabs: Search, Inbox, Openings, Data Submission, Admin, Event Tracking, and Reports. The main content area has a white background. At the top of this area, it displays "RESULTS201 - Inbox Search" in green text. Below this are several input fields and buttons. On the left, there is a "Org Unit" dropdown menu with "DAB - Arrow Boundary Forest Di" selected. Below this are "Opening:" and "Client:" labels, each followed by a text input field. To the right of these are "Opening Id:", "Licensee Opening Id:", "Licence No:", "CP:", "Timber Mark:", and "Cut Block:" labels, each followed by a text input field. Below these are "Status:" and "XML File Name:" labels, each followed by a text input field. At the bottom left, there is a "Standards ID:" label followed by a text input field. Below this is a "Sort By:" label with two radio buttons: "Type" (selected) and "Submitted Date". To the right of these are "Search" and "Clear" buttons. At the bottom left of the form area is a "Back" button. At the bottom of the page is a black footer bar with "Feedback", "Disclaimer", "Privacy", and "Copyright" on the left, and "MINISTRY OF FORESTS" on the right.

To bring up the block information for all submitted files you can choose Submitted under the Status section.

RESULTS201 - Inbox Search

Org Unit: DAB - Arrow Boundary Forest Di

Opening: Opening Id: Licensee Opening Id:

Client: Licence No: CP: Timber Mark: Cut Block:

Status: Submitted XML File Name:

Standards ID:

Sort By: ☒ Type ☐ Submitted Date

Note: If you are interested in assessing a specific block you will need to use as a minimum one of: Opening; Opening ID; Timber Mark/Cut Block; Licensee Opening ID/Client Number/Location; or Licence No / Cut Block.

Choose

Type	Opening ID	Licence	Cutting Permit	Timber Mark	Cut Block	Client & Locn	Status	Submit Date	Standards ID	
Amendment	113873	A18969	199	EZ9199	02D	00002468 00	SUB	2004-11-25		<input type="button" value="Details"/> <input type="button" value="Approve"/> <input type="button" value="Reject"/>
Amendment	27281	A20192	62	FA2062	1	00015692 03	SUB	2004-10-21	(+)	<input type="button" value="Details"/> <input type="button" value="Approve"/> <input type="button" value="Reject"/>
Amendment	-489220000	A03406				00030055 00	SUB	2004-06-21	(+)	<input type="button" value="Details"/> <input type="button" value="Approve"/> <input type="button" value="Reject"/>

The above information came up. Three amendment applications are in the Inbox. To determine the one you are interested in you must know one of the locators such as Opening ID, License CP, etc.

Note: Those with Approval Authority can approve the amendment by simply clicking on the tab. The recommended steps are to review the changes as described below prior to making that step.

In most cases the button will be chosen to see the submitted amendment.

By choosing you are taken to the **RESULTS 310 – Stocking Standards** screen.

STOCKING_LAYER_SPECIES_AMD	Min Height	SU 1 Layer I Spp BL	.6		2004-11-24 09:32AM	FSIAS\RES_MTI

The event tracking screen is set up with columns including two columns one for Old information and one for New. Each row constitutes a change. Some rows are more connotative than others. As is shown above row one under Old shows APP (approved) with AMD (amendment requested) under New, row two shows the proposed change in MITD from 1.2 to 1 m. The third and fourth rows are administrative and are not connotative. Row five shows BL was removed, and Row six shows that it was N to preferred, thus removed as an Acceptable species. Row seven shows that the Min Height was also removed when BL was removed from Acceptable. Other rows showing the addition of BL to preferred are below and not shown here.

Once the history has been reviewed, use the [Back](#) button twice to go back to **RESULTS312 - Stocking Standard Amendment Request** screen, where the rationale is found.

Once the history and rationale have been reviewed the DM can turn their attention on making a choice on accepting or rejecting the amendment request.

They must choose the [Back](#) button twice to get back to the **RESULTS201- Inbox Search** screen.

RESULTS610 - RESULTS610 - Event Description -- Web Page Dialog
RESULTS610 - Event Description
 Opening amendment is rejected, status set back to AMD (amended). Rejection note contents: There is a need for more information on the Beaver issue whether it is expected to be long term or temporary

Once the reason is reviewed a new amendment or revised request can be created.

To create a new amendment choose **Amendment Request** again.

You will need to go through the same steps of making the changes providing a rationale and resubmit. It may be optimal to discuss the comments with the DM prior to resubmitting if they are not easily addressed within the Stocking Standards.

If the requested amendment is rejected and you wish to revert to the original standards, simply go to the [Amendment Proposed](#) link on screen **RESULTS310 - Stocking Standards**, choose the hyperlink and at the bottom select **Delete Amendment Request**.

You will be asked by a popup whether you are sure you want to delete the request

Acceptable Species Min Height

EP - PAPER BIRCH 1.5

Amendment Rationale

This Standards Unit has been partially flooded due to Beaver activity in the nearby stream. Natural Bl is found on site. It was previously considered an Acceptable species. The Bl on site are doing well and due to its tolerance of flooding we request the status of Bl be modified to Preferred. To address the variability of good growing sites we request an amendment to the MITD from 1.2 to 1.0 m. We have also attached a pdf file with photographs of the block for your consideration.

 OK Cancel

If you are choose **OK**, the block Status is then changed back to APP (Approved).

Other amendments

Adding an SU

There may be situations where you would like to add or delete a Standards Unit from a Block. This can be done in RESULTS. Adding and deleting an SU can be done without approval for blocks with Standards ID (non Silviculture Prescription Blocks). Deletions can be done on all blocks without Approval. Where new SUs are added to blocks without Standards ID, the new SUs Standards must be approved. This is the scenario that is shown below.

Navigate to the Opening Inquiry Screen **RESULTS301 – Opening Inquiry** for the block of interest.

RESULTS

Before creating a new SU you will need to rectify the total SU areas with the Disturbance Gross Area. If the new SU is added to the Gross Area (e.g., blowdown patch) the Gross Block Area needs to be increased by the amount of the new SU (and roads etc). This can be done by going to the bottom of the Opening Inquiry Screen and scrolling to the bottom. If the new SU is replacing an old SU and the Gross Block Area is not affected disregard this step.

RESULTS310 - Stocking Standards						2 of 2    			
<div>Back</div> <div> <div>SU</div> <div>B</div> <div>Net Area To Be Reforested (ha):</div> <div>4</div> <div>Comment:</div> <div>N</div> </div> <div> <div>Max Soil Disturbance:</div> <div>BGC Zone/Sub/Var & Phase:</div> <div>ICH</div> <div>wk</div> <div>1</div> <div>Site Series/Type:</div> <div>06</div> <div>...</div> </div> <div> <div>Standards ID</div> <div></div> <div>Standards Name:</div> <div></div> <div>Amended:</div> <div>N</div> </div> <div> <div>Save</div> <div>Add</div> <div>Delete</div> </div>									
<div> <div>Regen Obligations:</div> <div>☒</div> </div> <div> <div>No Regen Obligations:</div> <div>☐</div> </div> <div> <div>Additional Standards:</div> <div>No</div> </div> <div> <div>Single</div> </div> <div> <div>Min Preferred Species / Height (m):</div> <div>Min Acceptable Species / Height (m):</div> <div>Well Spaced Trees / ha: Target:</div> <div>Planned Residual Basal Area (m2ha):</div> <div>Post Spacing Density (st/ha):</div> <div>Max Coniferous (st/ha):</div> <div>Height Relative to Comp(cm/%):</div> </div> <div> <div>Regen</div> <div>Early</div> <div>Late</div> </div> <div> <div>Min:</div> <div>Min Pref:</div> <div>Min Horiz (m):</div> </div> <div> <div>Min:</div> <div>Max:</div> </div>									
<div> <div>Update</div> <div>Amendment Request</div> </div>									

You will note the specifics for the Standard are now deleted (bottom of form) and require input. There are two options available. One is to use the Update function that allows for Approved Variations to be used without MoF approval (they have been pre approved at an FDP stage). The second approach is to request an Amendment. The second approach is shown here.

Once Amendment Request is chosen you will be prompted with if it is OK to change the status of the opening to AMD.

Update Amendment Request

Choose **OK**. Fill in the appropriate information and choose **Save** for each section.

RESULTS312 - Stocking Standard Amendment Request 2 of 2

Back History

Org Unit: DAB - Arrow Boundary Forest District
 Client Number: 00015692 Locn: 03 Name: SLOCAN FOREST PRODUCTS LTD
 Opening: 82K 033 0.0 58 Opening ID: 105940 Licensee Opening ID:
 SU: B Standards ID: Name: Objective:
 Geographic:

Max Soil Disturbance: %

Regen Obligations: ☒ Regen Early Late
 2 6 15
 No Regen Obligations: ☐

Additional Standards: Save

Do this for all sections of the screen (note the changes are in red background or text). Once completed go **Back** one screen to the **RESULTS310 - Stocking Standards** screen and scroll to the bottom, select Submit Amendment. A **save successful** note should appear at the top of the screen. The amendment needs to be approved by the MoF before the block will revert to APP status.

MoF Approval Process

The MoF will search for the submitted amendment in the **Inbox**, use **Inbox Search** to locate the submission. The search can be by the unique identifier if known or by choosing Submitted under the Status option.

RESULTS201 - Inbox Search

Org Unit: DAB - Arrow Boundary Forest Di
 Opening: Opening Id: Licensee Opening Id:
 Client: Licence No: CP: Timber Mark: Cut Block:
 Status: Submitted XML File Name:
 Standards ID:
 Sort By: ☒ Type ☐ Submitted Date Search Clear

Back

2 rows returned

Type	Opening ID	Licence	Cutting Permit	Timber Mark	Cut Block	Client & Locn	Status	Submit Date	Standards ID	
Amendment	105940	A20192	13	FA2013	3	00015692 03	SUB	2004-11-26	(+)	Details Approve Reject

The MoF should assess the changes by choosing **Details**. Two options for looking at the details of the amendment are available. The most useful is to go through the **Details**

box. It will take you to the [RESULTS310 Stocking Standards](#) screen. From there you will need to choose the [Amendment Proposed](#) hyperlink. Once there you can scroll down to see the various highlighted changes including the rationale.

Another option is to choose the [Amendment](#) hyperlink on the far left of the row, that will take you to the [RESULTS610 Event Tracking History](#) screen where the list of Events are stored. Choose the most recent (top most) [Amended](#) hypertext link. This will show what has been modified. It does not however show the rationale box, so to see the rationale you will need to go through the [Details](#) box as indicated above. If the rationale has been sorted out prior to the approval, this approach may be sufficient.

Once the information has been gone over and a decision can be made use the Back button to go back to the RESULTS210 – Inbox Search screen and made the appropriate selection, Approve or Reject. If the choice is to Reject the submission a reason must be given (scroll down to find the [Save](#) button at the bottom of the RESULTS201 Amendment Request – Reasons for Rejecting Request form). An email indicating the rejection will be sent to the submitter.

The screenshot shows a web browser window with the title bar 'Results Based Code Silviculture and Land Sta...'. The address bar displays 'http://testextranet5.for.gov'. The main content area is titled 'Reason For Rejecting Request' and contains a text input field with the text 'There was no rationale provided'. Below the text field is a 'Save' button. The browser's status bar at the bottom indicates 'Internet'.

The licensee can then resubmit to address the issues identified or return to the amended SU and delete it if the issue is seen as insurmountable.

Deleting an SU

Deleting an SU is relatively easy, simply go to the Stocking Standards drop down from the Openings box. Choose the SU you are wanting to Delete and choose the **Delete** function seen below.

Save Add Delete

Once Delete has been selected you are prompted to ensure that you are sure you wish to delete the SU. Choose **OK** if you are.

You will get a **Delete Successful** message at the top of the screen. This does not require an amendment to be approved by the MoF. The SU will be removed from any Milestones.

Milestone Declarations – Licensees

Milestone declarations can either be made through ESF submissions or directly in RESULTS. To make a declaration in RESULTS choose the Opening section and Milestones from the drop down menu.

NOTE: Only those with RESULTS DECLARATION or RESULTS APPROVAL security levels are authorized to make declarations.

Fill in the appropriate locator information and choose [Go](#). This will take you to the **RESULTS325 Milestone** screen. The available milestones (Declaration Types) will be provided at the bottom of the screen.

SU	SU Area	Declaration Type	Due Early	Due Late	Declared			Submission Date	
					Date	User ID	Cmt		
					<input type="text"/>				Save Cancel
1	3.1	Post Harvest	0	0	2000-09-02	FSIASVRES_MTI	No	2004-11-26	Update
1	3.1	Regeneration	0	7			No		Update
1	3.1	Free Growing	15	20			No		Update

Page 1 of 1

Choose the Declaration Type you wish to declare (Post Harvest, Regeneration, Free Growing) by clicking on the Update button on the right. Once chosen that declaration will be moved to the top allowing entry of the Declared Date – use the calendar provided or fill in the date using the appropriate format yyyy-mm-dd. If you wish to add a comment click on the [No](#) hyperlink in the Cmt column. Add the comment and choose [Save](#). The comment field will change to [Yes](#).

Note – dates must be in the past or present. Future dates are not accepted.

Your User ID will be captured in the User ID field along with the Submission Date. Only the MoF administrator or the person who made the declaration can undeclared it. To undeclared simply choose the Update for the Declaration Type and erase the date and choose [Save](#). A record of the declaration and deletion is found in the History section of RESULTS.

Help! Remember your online Help function. If you are still having problems try the Tutorial or contact Application Help at: FORHISP.APPHELP@gems5.gov.bc.ca

Or call

Information Management Group
Business Application Services (250) 387-8888

For more information on Declarations using the online help Tutorial go to:

http://www.for.gov.bc.ca/his/results/tutorial/htm/mile/mile_moduleintro.htm

An example of the format and content is shown below.

Module Intro

This Module Helps You:

- Learn how Milestones work in the RESULTS application
- Find out how to make a declaration
- Discover how the District Manager can reject a declaration
- Try your hand at an activity to re-enforce what you have learned

This module has two parts.

[Making A Declaration](#)

This first part is for licensee and ministry staff who need to make milestone declarations.

[Removing A Declaration](#)

This second part is for District Managers and their designates who can remove a declaration by "removing" its date. An activity for the entire module is also included as a module wrap-up. So try your hand at it!

Want to know what to expect? It's best to look at both parts of this module to understand the process.

Click Continue below for an overview of how Milestones, Form C, and declarations fits in the process.

How To Remove/Delete A Declaration

What The DM Can Expect

- All of the data to set up milestones is entered through the ESF website. In RESULTS, only the declaration date and comments can be changed. To make these changes a person must have correct administrative privileges and only the person who submitted the declarations (entered the date and saved it) can change it
- However, if it is discovered through an inspection that the obligations have not been met, there is a way to address rejecting a declaration by "removing" the declaration date

Example:

A licensee may have submitted a free growing declaration on an standards unit. The District Manager may determine that after a field inspection of the area the licensee has declared as free growing, that certain risks are present on the site (competing vegetation, forest health factor.) As well the area is not likely to remain free growing. The District Manager would notify the licensee and not consider the area free growing and identify in a notice in writing that the obligation specified in the declaration has not been met, and that the holder remains responsible for meeting that obligation.

Removing A Declaration

- If seeking to remove a declaration, you need to contact the [BASS \(systems support\)](#). They have the authority to remove the date from the declaration. In this way, a declaration is removed
- When contacting the [BASS \(systems support\)](#), you need to advise which opening is affected. Below are the steps to locate the opening, verify that this is the one affected, and remove the date

Appendix 1 – Quick Reference Cards

RESULTS Quick Reference Card 1

RESULTS

Reporting Silviculture Updates and Land Status Tracking System

Navigating RESULTS

Accessing RESULTS

RESULTS can be accessed by any computer that meets MOF Standards and is connected to the Internet.

You can access RESULTS by going to: <http://www.for.gov.bc.ca/his/results>. Providing you have been granted RESULTS security access, select 'RESULTS Application' to launch the RESULTS application. RESULTS will automatically recognize users based on their MoF USERID or BceID.

Understanding Security

Ministry and other government staff must have a valid IDIR account and Licensees must have a valid BceID in order to apply for access to the specific security roles in RESULTS. Once you know what you will be doing in RESULTS, obtaining the correct role is done by completing the 'Application Access form for ESF and RESULTS' and is also found at the above web site.

Security level	Authorised Function	User Groups
ESF BROWSER/	Authority to review all ESF submissions	Licensees/Government
ESF SUBMITTER	Authority to review and submit ESF submissions.(Licensees must also have RESULTS UPDATE to upload RESULTS data, or RESULTS DECLARATION to upload milestone declarations).	Licensees/Government
RESULTS VIEW ONLY	Authority group allows General Inquiry mode.	Licensees/Government
RESULTS REPORTING	Authority group allows General Inquiry mode with access to Reporting.	Licensees/Government
RESULTS UPDATE	Authority group allows General Inquiry, Reporting, and Data Update mode. This role is made for MoF staff creating changes to existing RESULTS information, creating and submitting standard proposals, and submitting standard unit amendments.	Licensees/Government
RESULTS DECLARATION	Authority group allows General Inquiry, Reporting, Data Update, and Milestone Declaration mode. Role is made for MoF that require all the previous roles as well as those required to declare milestone obligations met.	Licensees/Government
RESULTS APPROVAL	Authority group allows General Inquiry, Reporting, Data Update, and Milestone Declaration mode. Role made for district managers, or their designates who can approve/reject proposed standards and opening amendment requests.	Government

Using Tabs to find your way around!

RESULTS has a series of tabs in the top navigation bar. Each tab represents a separate function in RESULTS. When you click a tab, you are offered a series of choices. It's helpful to think of these tabs as

offering you a series of forms to choose from. When you select one of the choices from the drop-list, the corresponding form will display.

Integration is a fundamental concept of RESULTS. By using searches and drop-down menus, users may easily navigate to all the RESULTS components. Note that users will still require authority to access applications linked to RESULTS like SPAR and FTA.

Getting Web Savvy!

If you have not worked much with web applications the following tips will improve your web savvyness and allow you to use RESULTS with ease:

* To access RESULTS, you need to go through your Web Browser and enter the URL. To save you time and typing you should add RESULTS to your "favorites" the first time you use it.

* You should always start a fresh browser session before using RESULTS. - hit the refresh button before you start your new session.

* Always complete each task before leaving your workstation unattended in case you lose your Internet connection. RESULTS will time-out after 30 minutes of inactivity, you will be re-directed to the RESULTS Homepage and any unsaved data will be lost.

* RESULTS will sometimes take a few moments to process tasks, but the cursor will not change to the hourglass when the application is thinking. Instead, the spinning globe in the top right of the browser indicates when the application is still thinking.

* Use the navigation tabs in RESULTS to move around NOT the browser buttons at the top of the page.

* Use the Tab key to move from field to field. Don't use your Enter key instead of your Tab key as this may submit a form rather than moving you between fields.

* Use the delete button carefully. In a web-based application, you will not receive a prompt to continue if you use the delete button. Therefore, once you click delete, your information will be deleted without a warning. You cannot use the back button to restore your information.

Contact Information

If you are having technical difficulties, or have business related questions regarding application, tutorial, on-line help or documentation please contact: The Business Application Support Center through:
