

FIRE BEHAVIOUR ADVISORY - CARIBOO FIRE CENTRE

Date issued: Thursday August 5, 2021

>>>A Fire Behaviour Advisory is in effect today:<<<

- The advisory is for C3 and C7 and slash fuel types for the whole fire centre with the exception Anahim Lake through Quesnel to the Bowron Lake chain and Mahood Lake area.
- There is a potential wind event starting as early at 12:00 today.
- For the Central Chilcotin area encompassing Place Lake south to Churn Creek and west through Alexis Creek and Puntzi to Tatla Lake there is potential for intermittent crown fire from 1100-2000 when winds exceed 10 km/hr, and an Extreme Fire Behaviour Advisory with the potential for continuous crown fire from 1600-1800 when winds exceed 10 km/hr.
- For everywhere else in the advisory there is potential for intermittent crown fire from 1200-2100 when winds exceed 10 km/hr.
- For slash fuel types there is potential for fire intensity to exceed 10,000 kw/m throughout the day, with rates of spread up to 18 m/min.
- This is a result of dry fuels, high temperatures, moderate RH values, and moderate wind speeds.

Be aware of local topographic features and their effects on fire behavior. Practice LACES.

>>>USE YOUR RED BOOK TO MAKE ADJUSTMENTS FOR YOUR PARTICULAR ON SITE CONDITIONS!<<<
