

FIRE BEHAVIOUR ADVISORY - CARIBOO FIRE CENTRE

Date issued: Friday, June 25, 2021

>>>A Fire Behaviour Advisory is in effect today:<<<

- The advisory is for C3 and slash fuel types in an area bounded in the North by the Tautri weather station, West to Anahim Lake and Middle Lake, South to Nemiah, and to the East by Young lake.
- The advisory is in effect from 14:00-20:00 when winds exceed 10 km/hr.
- There is potential for crown fire in C-3 fuels from 16:00-19:00 near Alexis Creek and the Tautri weather station if winds exceed 15km/hr.
- For slash fuel types there is potential for fire intensity to exceed 10,000 kw/m throughout the day, with rates of spread up to 25 m/min.
- This is a result of dry fuels, high temperatures, and low RH values.

Be aware of local topographic features and their effects on fire behavior. Practice LACES.

>>>USE YOUR RED BOOK TO MAKE ADJUSTMENTS FOR YOUR PARTICULAR ON SITE CONDITIONS!<<<
