

FIRE BEHAVIOUR ADVISORY - CARIBOO FIRE CENTRE

Date issued: Saturday, June 28, 2021

>>>A Fire Behaviour Advisory is in effect today:<<<

- The advisory is for C3, C7, and slash fuel types in an area bounded in the North by the Nazko weather station, West to Anahim Lake and Middle Lake, South to Nemiah, and to the East by Young Lake and Horsefly.
- For areas South of Anahim Lake, Tautri, and Young Lake the advisory is in effect from 09:00-22:00 when winds exceed 15 km/hr, with potential for crown fires from 12:00-21:00.
- For areas North of Anahim Lake, Alexis Creek, and Young Lake, there is potential for intermittent crown fire from 14:00-21:00 when winds exceed 15 km/hr, with potential for crown fires from 14:00-20:00.
- For slash fuel types there is potential for fire intensity to exceed 10,000 kw/m throughout the day, with rates of spread up to 28 m/min.
- This is a result of dry fuels, high temperatures, and low RH values.

Be aware of local topographic features and their effects on fire behavior. Practice LACES.

>>>USE YOUR RED BOOK TO MAKE ADJUSTMENTS FOR YOUR PARTICULAR ON SITE CONDITIONS!<<<
