

FIRE BEHAVIOUR ADVISORY - CARIBOO FIRE CENTRE

Date issued: Wednesday, June 23, 2021

>>>A Fire Behaviour Advisory is in effect today:<<<

- The advisory is for C3, C5, C7 and Slash Fuel types in an area bounded West of a line from Wells in the North, West of Quesnel Lake and West of the Deception Weather station in the South.
- In C3 Fuel types For this area from 0900-2200 there is a potential for Intermittent Crown Fires and Fire Intensity Class 5 with winds above 5km/h. From 1200-2100 expect Fire Intensity class 6 with excess of 10,000 Kw/m and potential for Continuous Crown Fires
- For C5 fuel types, for an area bounded by Benson in the North, including, Likely, Gavin lake and Horsefly in the South from 12:00 to 20:00 there is potential for Surface fires to exceed Intensity Class 5 with winds greater the 10km/h
- For slash fuel types across the fire centre there is potential for fire intensity to exceed 10,000 kw/m throughout the day, with rates of spread up that could exceed 40 m/min.
- This is a result Dry Fuels, High Temperatures, Low RH Values and moderate wind speeds.

Be aware of local topographic features and their effects on fire behavior. Practice LACES.

>>>USE YOUR RED BOOK TO MAKE ADJUSTMENTS FOR YOUR PARTICULAR ON SITE CONDITIONS!<<<
