

FIRE BEHAVIOUR ADVISORY - CARIBOO FIRE CENTRE

Date issued: Monday August 1, 2022

>>>An Extreme Fire Behaviour Advisory is in effect today:<<<

- The advisory is for C3 and C7 fuels for the entire fire centre except an area including the Bowron Lake Chain and the North and East arm of Quesnel Lake.
- For C3 fuel types there is potential for rank three fire behaviour from 10:00 to 22:00, and for C7 fuels from 12:00-20:00 when winds exceed 10 km/hr.
- From Nazko across to Tautri South to Nemiah, East to Williams Lake, and South to Young Lake there is potential for Intermittent Crown fire from 11:00-20:00 when winds exceed 10 km/hr.
- For slash fuel types there is potential for fire intensity to exceed 10,000 kw/m throughout the day, with rates of spread up to 27 m/min.
- This is a result of high temperatures, low rh, and very dry fine fuels.

Be aware of local topographic features and their effects on fire behavior. Practice LACES.

>>>USE YOUR RED BOOK TO MAKE ADJUSTMENTS FOR YOUR PARTICULAR ON SITE CONDITIONS!<<<
