

Burned Area Mapping

The Burn Severity map shows a Relativized Burn Ratio Index (RBR) calculated from Landsat 8.

Burn Severity Level should be interpreted with caution as no field-based assessment of burn severity was available for data calibration. Burn Severity Level provides a relative indication of the fire burn severity.

- Fire Perimeter
- Highways
- Roads
- Provincial Protected Areas
- National Parks
- Burn Severity Level**
- Low Severity
- Moderate Severity
- High Severity

Project Metadata	
C10822	
Sensor	Landsat 8
Pre-fire:	05-Jul-17
Post-fire:	06-Aug-17
Image quality:	High quality: Yes
	No smoke or haze.
Produced by:	Diana Brizan
