

Burned Area Mapping

The Burn Severity map shows a Relativized Burn Ratio Index (RBR) calculated from Landsat 8.

Burn Severity Level should be interpreted with caution as no field-based assessment of burn severity was available for data calibration. Burn Severity Level provides a relative indication of the fire burn severity.

- Fire Perimeter
 - Highways
 - Roads
 - Provincial Protected Areas
 - National Parks
- Burn Severity Level**
- Low Severity
 - Moderate Severity
 - High Severity

Project Metadata
