

RBAM Beta

Rapid Burned Area Mapping

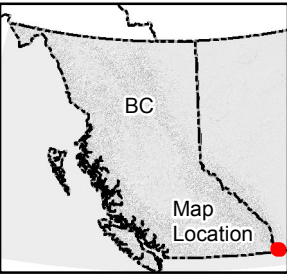

The Burn Severity map shows a Relativized Burn Ratio Index (RBR) calculated from Landsat 8 images acquired 2017-08-03 11:00 PT and 2017-09-04 11:00 PT. Burn Severity Level should be interpreted with caution as no field-based assessment of burn severity was available for data calibration.

- Fire Perimeter

Burn Severity Level

- No Data
- Moderate severity
- Low severity
- High severity

Product Metadata	
Sensor	Landsat 8
Pre-fire:	Aug 03/17
Post-fire:	Sep 04/17
Image quality:	High quality pre- and post-fire images. Active fires in the post-fire image were masked to prevent artefacts in the burn severity information.
