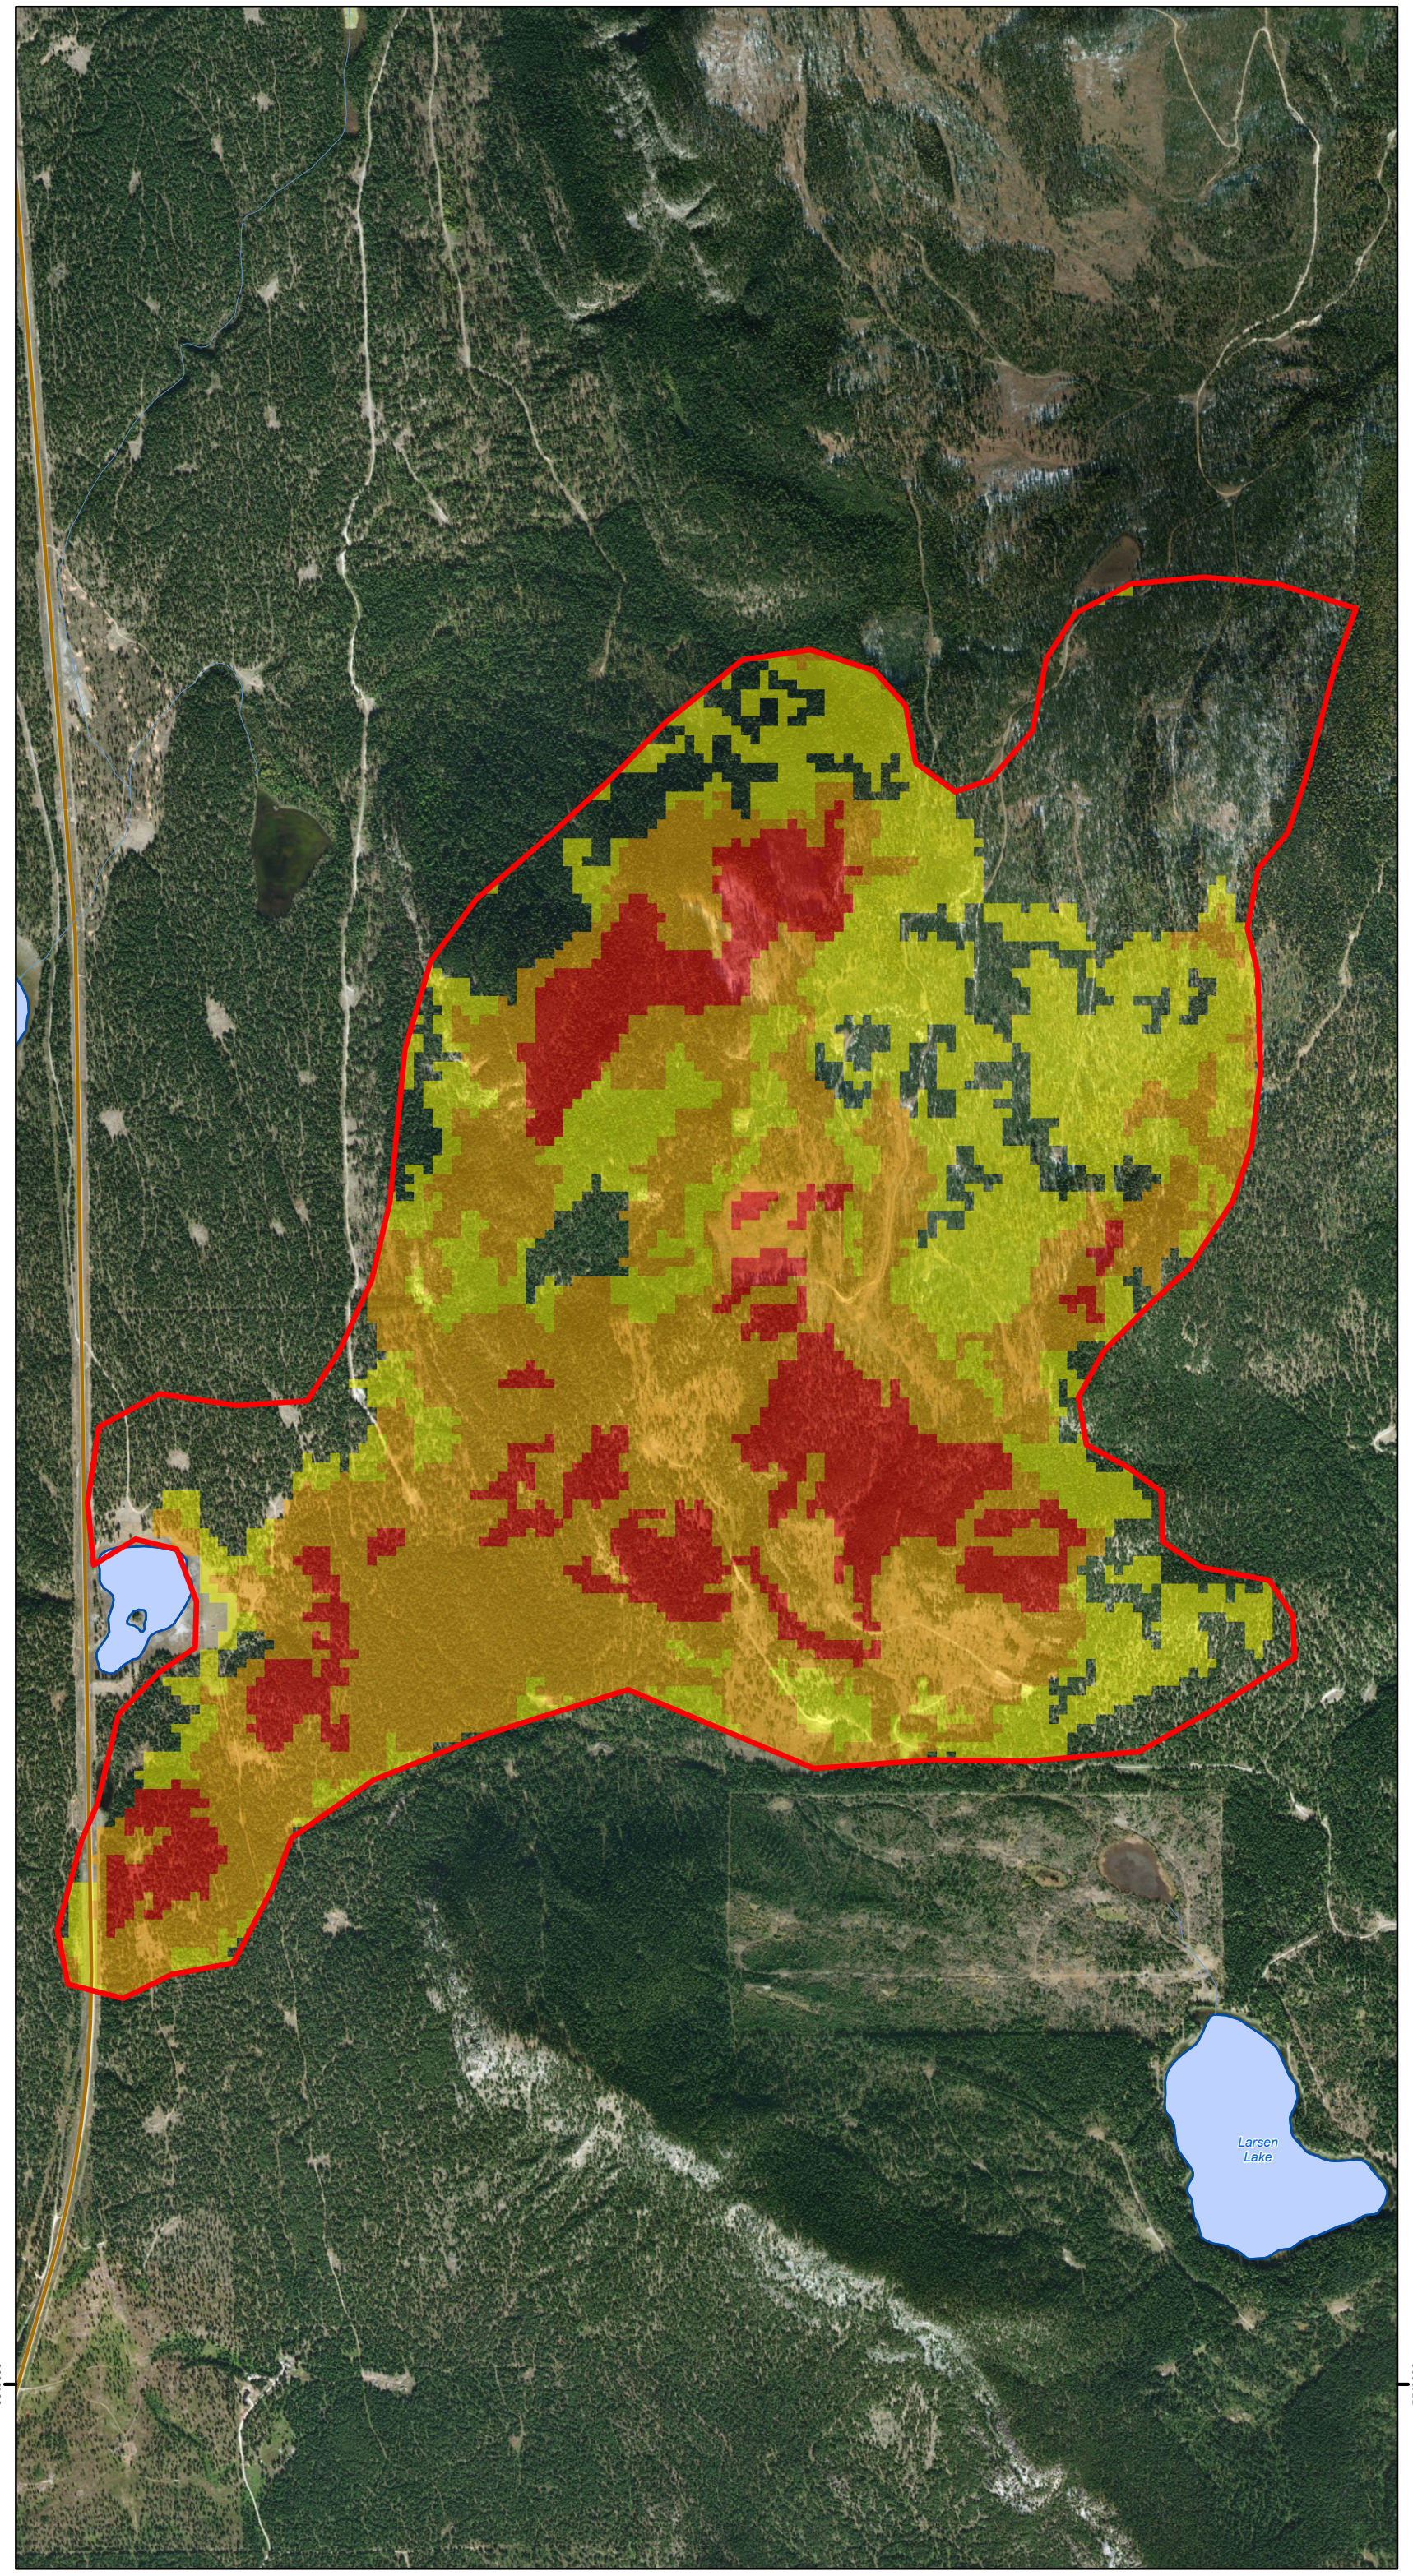
N21451 - Island Pond



Burned Area Mapping

The Burn Severity map shows a Relativized Burn Ratio Index (RBR) calculated from Landsat 8.

Burn Severity Level should be interpreted with caution as no field-based assessment of burn severity was available for data calibration. Burn Severity Level provides a relative indication of the fire burn severity.

- Fire Perimeter
- Highways
- Roads
- Provincial Protected Areas
- National Parks

Burn Severity Level

- Low Severity
- Moderate Severity
- High Severity
