 - No Threat
 - 1 - Low
 - 2 - Low
 - 3 - Low
 - 4 - Moderate
 - 5 - Moderate
 - 6 - Moderate
 - 7 - High
 - 8 - High
 - 9 - Extreme
 - 10 - Extreme
 - Populated Place / Locality
 - Highway
 - Main Road
 - Rail Line
 - River or Reservoir
 - Lake
 - Wetland
 - Icefield or Ice mass
 - Mountain

* There are six 2018 Fire Perimeters not drawn as revisions to threat on these fires have been incorporated: Silver Lake (R1168), Nappa Lake (R2121), Varun (R11796), Island Lake (R11821), Chelista River (R11683) and Telegraph Creek (R91947).

Disclaimer:
All information shown on this map is provided "as is" without any warranty or representation whatsoever. This map is intended for Fire Management, Planning, purposes only and is not suitable for any other use or reproduction without the express written consent of the BC Wildfire Service. The map contains highly sensitive data. Any other use or reproduction without the express written consent of the BC Wildfire Service is strictly prohibited.

Fuel Treatment Disclaimer:
Completion of operational fuel management data provided to BC Wildfire but managed through the Community Resiliency Investment (CRI) program, and Reporting Structure Updates and Land Status Tracking System (RESULTS). For more information contact the Fire Centre, Local Government or First Nations Band. Source: CRI data current to May 25, 2020; will include all approved projects from 2013 to this date. Polygons in this date may vary.

PSTA 2019 Disclaimer:
The information presented within the Provincial Strategic Threat Analysis (PSTA) is derived from datasets and models that represent a provincial-level assessment of approximate relative wildfire threat across the land base.

It is intended to provide a strategic-level analysis of many different factors that contribute to wildfire threat, but it is not intended to represent absolute, site-specific values. The Provincial Strategic Threat Analysis was created at a provincial scale, so users of this product need to confirm that the initial wildfire threat rating assigned to a given area is accurate by having a qualified professional validate that rating at the forest stand level.

Any limitations of the Provincial Strategic Threat Analysis are related but not limited to the accuracy of the Vegetation Resource Inventory (VRI), the 17 fuel types identified under the Canadian Forest Fire Behavior Prediction (CFFB) System, historical fire data, and assumptions associated with the development of the head fire intensity and spotting impact data layers.

The Provincial Strategic Threat Analysis does not provide an assessment of wildfire threats on private land parcels, since these are best determined through a site-level assessment such as FireSmart. The Provincial Strategic Threat Analysis was designed to assess the forested land base, while the FireSmart hazard assessment takes into consideration individual structural components (e.g. roofing and siding), fences, window glass and vegetation. To receive and beyond from the disclaimer — any areas related to the spatial of this a community, the Wildland Urban Interface (WUI) component of the Provincial Strategic Threat Analysis does not take this map into consideration.

Any components within the data that are derived from structure-related information are intended to provide a strategic-level analysis, but they are not intended to represent absolute, site-specific values. Any limitations of this Wildland Urban Interface data are related but not limited to the accuracy of the Vegetation Resource Inventory Management (TRIM) data, Integrated Catastrophe Information Society (ICI Society) Address/CAT data, BC Assessment data, and other local datasets. It is the responsibility of users to determine the suitability of this data for their projects.

The BC Wildfire Service makes no warranties or guarantees either expressed or implied as to the completeness, accuracy or correctness of the data, nor accept any liability arising from any incorrect, incomplete or misleading information contained therein.

All data and databases are provided "as is" with no warranty, expressed or implied, including but not limited to, those for a particular purpose. By accepting the Provincial Strategic Threat Analysis data, the user agrees to hold the BC Wildfire Service, its staff and contractors, its liability released from any and all responsibility and liability associated with their use.
