 - Lake - Intermittent
 - Quarry or Reservoir
 - Flooded Land or Marsh

* There is one 2018 Fire Perimeter (Alkali Lake R01947) drawn in
conjunction with the 2021 Fire Perimeters as it is not shown to threat on
these fire have not been incorporated. Some fire starts merged with
adjacent incidents during the 2021 Season and therefore the maps
are only showing the largest all-encompassing perimeter in that area.

Disclaimer:
All information shown on this map is provided "as is" without any
warranty or representation whatsoever. This map is intended for Fire
Management Planning purposes only and is not suitable for site-
specific decision making. The map contains highly sensitive data. Any
other use or widespread reproduction/distribution is strictly prohibited.

Fuel Treatment Disclaimer:
Comparison of operational fuel management data provided to BC
Wildfire but managed through the Community Resiliency Investment
(CRI) program and Prescribed Structure Updates and Land Status
Tracking System (RESULTS). For more information, contact the Fire
Centre, Local Government or First Nations Band, source CRI data
current to June 11, 2021. It will include all approved projects from 2013 to
this date. Polygons in this data may overlap.

PSTA 2021 Disclaimer:
The information presented within the Provincial Strategic Threat
Analysis (PSTA) is derived from datasets and models that represent a
provincial-level assessment of approximate relative wildfire threat
across the land base.

It is intended to provide a strategic-level analysis of many different
factors that contribute to wildfire threats, but it is not intended to
represent absolute, site-specific values. The Provincial Strategic Threat
Analysis was created at a provincial scale, so users of this product
need to confirm that the initial wildfire threat rating assigned to a given
area is accurate by having a qualified professional validate that rating
at the forest stand level.

Any limitations of the Provincial Strategic Threat Analysis are related
but not limited to the accuracy of the Vegetation Resources Inventory
(VRI), the 17 fuel types identified under the Canadian Forest Fire
Behaviour Prediction (CFBP) System, historical fire data, and
assumptions associated with the development of the head fire intensity
and spreading impact data layers.

The Provincial Strategic Threat Analysis does not provide an
assessment of wildfire threats on private land parcels, since these are
best determined through a detailed assessment such as FuelTreat.
The Provincial Strategic Threat Analysis was designed to assess the
forested land base, while the FuelTreat hazard assessment takes into
consideration individual structural components (e.g. roofing and siding),
fences, exotic plants and vegetation 10 metres and beyond from the
structure — key areas linked to the spread of fire in a community. The
Wildland Urban Interface (WUI) component of the Provincial Strategic
Threat Analysis does not take this information into consideration.

Any components within the data that are derived from structure-related
information are intended to provide a strategic-level analysis, but they
are not intended to represent absolute, site-specific values. Any
limitations of this Wildland Urban Interface data are related but not
limited to the accuracy of the Terrestrial Resource Inventory Management
(TRIM) data, Integrated Cadastral Information Society (ICI Society)
AddressBC, Assessment data, and other local datasets. It is
the responsibility of users to determine the suitability of this data for
their projects.

The BC Wildfire Service makes no warranties or guarantees either
expressed or implied as to the completeness, accuracy or correctness
of the data, nor accept any liability arising from any incorrect,
incomplete or misleading information contained therein.

All data and databases are provided "as is" with no warranty, expressed
or implied, including but not limited to threats for a particular purpose.
By accessing the Provincial Strategic Threat Analysis data, PDF files or
any product derived from the data, the BC Wildfire Service, its staff and
contractors are hereby released from any and all responsibility and
liability associated with their use.
