

Issued at 0900 Thursday 2 September 2010

**HIGH STREAMFLOW ADVISORY**

Issued for: the Stikine River basin  
The Nass River basin  
The Skeena River basin

A **High Streamflow Advisory** is in effect for the Stikine, Nass and Skeena River basins.

Heavy rainfall in excess of 50 millimetres is expected in these areas within the next 24 hours.

Stream levels are currently low in these river basins but are expected to rise rapidly in response to the heavy rainfall.

No flooding is expected.

This advisory will be updated later this afternoon.

---

**Definitions:**

**High Streamflow Advisory** – A high streamflow advisory means that river levels are rising or expected to rise rapidly, but that ***no major flooding is expected***. Minor flooding in low-lying areas is possible.

**Flood Warning** – A flood warning means that river levels are expected to exceed bankfull conditions, and that flooding of areas adjacent to these rivers affect will result.
