BC River Forecast Centre

ENDED - Flood Warning: Upper Fraser River
UPDATED: 16 May 2013 10:30 AM

The BC River Forecast Centre is **ending** a **Flood Warning** for:

- Upper Fraser River (at Prince George and upstream)

River levels along the Upper Fraser peaked yesterday, and are now receding. Weather conditions over the next few days are favourable for continued improvements, and river levels are expected to continue to drop through the weekend.

The River Forecast Centre will continue to monitor conditions and will provide updates as required.

A ***High Streamflow Advisory*** means that river levels are rising or expected to rise rapidly, but that no major flooding is expected. Minor flooding in low-lying areas is possible.

A ***Flood Watch*** means that river levels are rising and will approach or may exceed bankfull. Flooding of areas adjacent to affected rivers may occur.

A ***Flood Warning*** means that river levels have exceeded bankfull or will exceed bankfull imminently, and that flooding of areas adjacent to the rivers affected will result.
