## BC River Forecast Centre (<http://bcrfc.env.gov.bc.ca/>)

---

**ENDED : High Streamflow Advisory: South Coast**

**UPDATE: 30September2013 2:30PM**

The BC River Forecast Centre is **ending a High Streamflow Advisory** for the **South Coast** including:

- **Howe Sound**
- **North Shore Mountains**
- **Fraser Valley (including Chilliwack River)**

River levels throughout the South Coast have been elevated over the past two days in response to a number of heavy rainfall storms that have impacted the region over the weekend. Rainfall rates have now eased and river levels are expected to recede slowly over the next few days.

The River Forecast Centre will continue to monitor conditions and will provide updates as conditions warrant.

---

A **High Streamflow Advisory** means that river levels are rising or expected to rise rapidly, but that no major flooding is expected. Minor flooding in low-lying areas is possible.

A **Flood Watch** means that river levels are rising and will approach or may exceed bankfull. Flooding of areas adjacent to affected rivers may occur.

A **Flood Warning** means that river levels have exceeded bankfull or will exceed bankfull imminently, and that flooding of areas adjacent to the rivers affected will result.
