VEGETATION LABEL DETAILS

Example of a Vegetation Label:

LINE DESCRIPTION
1 Silviculture symbol and Opening Number
2 Polygon Number and Multi-layer stand indicator (L)
3 Species Composition
ex: the most dominant layers is described as Fd (Douglas Fir) and Hw (Western Hemlock).
4 Age, Height, Crown Closure Class Code - separated - Site Index / estimated SI
ex: stand is age class 2 (21-40 yrs), height class 1 (0-10 dm), crown closure class 5 (6-15%), SI 20m
5 Disturbance History - separated by commas if more than one
ex: a herb polygon with no distinction between forbs and graminoids, shrubs less that 2m.
6 Disturbance History & year - ex: Logged in 1978

4d. ECOLOGY INDEX
All the ecosystem is the mean/norm referenced at 60 years
Site Index is the mean height of dominant trees at breast height age
making quotient. Where available SI denotes the observed Site
age and height, estimated SI is shown after, or replaces the SI.

4e. ESTIMATED SOURCE
SI is estimated when available SI trees aren't present, e.g.
recently logged or young stands. The source of the estimate is
provided in two-letter form. In the first case an inventory
Type Group and SI estimated source code.
