4d SITE INDEX
Bill 50 and base is the reference tree reference at 50 years.
Site Index is the height of a tree at a specified age (usually 50 yrs).
Inventory records - information accepted if submitted obtained from age and height, estimated if is shown after, or replaces the SI.

4e. ESTIMATED SITE INDEX
SI is estimated using Site Series & wind present, e.g.
01 is estimated using Site Series 01 and a stand which is wind
previous it. Associated fields in the data base are Inventory
Type Group and SI if otherwise would exist.
