4d SITE INDEX

All SI are shown to the nearest meta referenced at 50 years breast height age. SI is based on the species listed in Line 3. Where SI is not available or cannot be determined from age and height, estimated SI is shown after, or replaces the SI.

4e. ESTIMATED SITE INDEX

SI is estimated when suitable SI trees arenot present, e.g. young regenerating stands. The SI is based on the species which provides it. Associated SI(s) in the data base are inventory Type Group and SI if estimated source code.
