4d SITE INDEX

All SI are shown to the nearest meter & referenced at 50 years breast height age, unless otherwise noted (eg. 30 years total age, leading species). Where an accurate SI cannot be obtained from age and height, estimated SI is shown after, or replaces the SI.

4e ESTIMATED SITE INDEX

SI is estimated when suitable SI trees cannot present, e.g. Immature stands, or the SI is not known. Estimated SI is always denoted E. Associated fields in the data base are Inventory Type Group and SI Estimated source code.
