4d SITE INDEX

SI: SI are shown in the nearest metre referenced at 50 years Breast Height Age. SI is based on the age and height of the leading species. Where an accurate SI cannot be obtained from age and height, estimated SI is shown after, or replaces the SI.

4e ESTIMATED SITE INDEX

SI is estimated where suitable SI trees aremot present, e.g. young stands (<50yrs). It is denoted by a slash which always precedes it. Abbreviated fields in the data base are Inventory Type Group and SI Estimated source code.
