4d SITE INDEX
All SI are shown to the nearest metre referenced at 50 years Breast Height Age. SI is based on the age and height of the Dominant and Co-dominant trees. Where the combination of age and height addressed SI is shown after, or replaces the SI.

4e ESTIMATED SITE INDEX
SI is estimated when suitable SI trees are not present, e.g. young stands (<30yrs). It is denoted by a slash which always follows the SI. The species letter code for the tree symmetry Type Group and SI/3 estimated source code.
