4d SITE INDEX

All SI are shown to be nearest metre referenced at 50 years Breast Height Age. SI is based on the age and height of the Leading Species. Site Index is not shown on polygons with inventory age and height estimated SI is shown after, or replace the SI.

4e. ESTIMATED SITE INDEX

SI is estimated when suitable SI trees almost present, e.g. young stands (<30yrs). It is denoted by a slash which always follows the Leading Species. SI is based on Site Inventory Type Group and SI Estimated source code.
