4d SITE INDEX

All SI are shown to the nearest metre referenced at 50 years.
SI is estimated from a variety of sources and is not always a leading species. When an accurate SI is known to be obtained from age and height, estimated SI is shown after, or replaces the SI.

4e. ESTIMATED SITE INDEX

SI is estimated when symbol SI label is present, e.g. young stands (<20yrs). It is denoted by a slash which always precedes it. Associated fields in the data base are Inventory Type Group and SI Estimated source code.
