4d SITE INDEX

All SI are shown to the nearest meter referenced at 50 years Breast Height Age. SI is based on the age and height of trees. If the SI is estimated from the Site Tool (based on species, age and height), estimated SI is shown after, or replaces the SI.

4e ESTIMATED SITE INDEX

SI is estimated when suitable SI trees are not present, e.g. young stands (< 30 years), or non-forested. Estimated SI is shown in brackets if recorded fields in the data base are inventory Type Group and SI Estimated source code.
