4d SITE INDEX

All SI are shown to the nearest metre referenced at 50 years breast height age. Where a site index is not shown, the SI is being applied, either because it is not applicable or is absent from age and height, estimated SI is shown after, or replaces the SI.

4e. ESTIMATED SITE INDEX

SI is estimated when suitable SI trees are not present, e.g. Non-Forest, Non-Productive, Non-Vegetated. The SI is derived from the Variant Provided 5 Associated fields in the data base are Variant, Type Group and SI Estimated source code.
