4d SITE INDEX

All SI are shown for the nearest metre referenced at 50 years Breast Height Age. SI is based on the age and height of the leading species. When an accurate SI cannot be obtained from ages and heights estimated SI is shown after (or replaces the).

4e. ESTIMATED SITE INDEX

SI is estimated when suitable SI trees are not present, e.g. young stands (<25yrs). It is denoted by a dash which always precedes it. Associated letters in the data base are Inventory Type Group and SI Estimated source code.
