4d SITE INDEX

All SI are shown to the nearest metre referenced at 50 years breast height age. SI may be estimated for all or only the leading species. When an accurate SI cannot be obtained from age and height, estimated SI is shown after, or replaces the SI.

4e ESTIMATED SITE INDEX

SI is estimated when suitable SI trees are not present, e.g. young stands. The SI source code is a three digit code which increases precision if. Associated fields in the data base are Inventory Type Group and SI Estimated source code.
