4d SITE INDEX

All SI are shown to the nearest metre referenced at 50 years breast height age. SI values are derived from a variety of site index feeding systems. When an accurate SI has been determined from age and height, estimated SI is shown after, or replaces the SI.

4e ESTIMATED SITE INDEX

SI is estimated when suitable SI trees aren't present, e.g. recently logged areas. Refer to the Site Index Adjustment Procedures 4. Record the Site Index in the data base as Inventory Type Group and SI Estimated source code.
