**4d SITE INDEX**
All SI are shown to the nearest metre referenced at 50 years Breast Height Age. SI is based on the age and height of the dominant and co-dominant trees. Where a polygon has both age and height, estimated SI is shown after, or replaces the SI.

**4e ESTIMATED SITE INDEX**
SI is estimated where suitable SI trees exend present, e.g. young stands (<50yrs). It is denoted by a slash which always precedes the estimated site index. Estimated Site Index Inventory Type Group and SI Estimated source code.
