This map is created from information stored digitally in the BC Geographic Warehouse. The map has been structured to facilitate printing on standard 8.5" x 11" paper. Due to the inherent inaccuracies in digital data, features portrayed may not be complete and up to date.Cadastral, administrative boundaries and the Ownership colour theme are for reference purposes only. VEGETATION LABEL DETAILS

Example of a Vegetation Label:

LINE DESCRIPTION
1 Silviculture symbol and Opening Number
2 Polygon Number - assigned by multi-layer stand indicator (L)
3 Species Composition
ex. the most important layer is described as Fd (Douglis Fir) and Hw (Western Hemlock).

5 Vegetated Density Class (or Non-Forest/Productive Descriptor)
ex. a herb polygon with no distinction between forbs and graminoids, shrubs less that 2m.
6 Disturbance History & year - ex. Logged in 1979

4d SITE INDEX

All SI are shown to the nearest metre referenced at 50 years breast height age. Where an actual SI cannot be determined for a leading species, 'other' are coded SI cannot be determined. Where age and height, estimated SI is shown after, or replaces the SI.

4e. ESTIMATED SITE INDEX

SI is estimated when suitable SI trees cannot present, e.g. young stands (regen) or stands that have been logged. Estimate provides 5 Associated fields in the data base are Inventory Type Group and SI Estimated source code.
