This map is created from information stored digitally in the BC Geographic Warehouse. The map has been structured to display the vegetation resource inventory (VRI) data. Every effort has been made to ensure that the digital data contained herein has not be corrupted, and as to date (currency) of administrative boundaries and the Cadastre (alloy) theme as compiled from the Integrated Cadastral Fabric (ICF).

9 Disturbance History & year - ie. Logged in 1978

Line 1 - History Record Opening Number

xxxx - opening number will be RESULTed xxxxR - opening number has not been assigned

Line 2 - Polygon No. - Multi-layer

Polygon number is a unique number that can be no more than 4 digits.
L - Multi-layered area - at least the description of layer 2 is available in the data base, i.e. 1 (L).

Line 3 - BC Tree Code List

Species composition - Species are detailed in their order of predominance. Major first Minor or Incidents. The following codes are based on TRIM Standard Forest Inventory Tree Code List dated January 2006.
