4d SITE INDEX
All SI are shown to the nearest metre referenced at 50 years Breast Height Age. SI is based on the age and height of the dominant and co-dominant trees. When SI is estimated from both age and height, estimated SI is shown after, or replaces the SI.

4e ESTIMATED SITE INDEX
SI is estimated when suitable SI trees aremot present; e.g. young stands (<30yrs). It is derived by a stash which always accompanies the estimated value. The stashes are Inventory Type Group and SI Estimated source code.
