4d SITE INDEX
All SI are shown to the nearest metre referenced at 50 years Breast Height Age. SI is based on the age and height of the dominant trees. Where a stand is layered, the dominant trees in age and height, estimated SI is shown after, or replaces the SI.

4e: ESTIMATED SITE INDEX
SI is estimated when suitable SI trees aremnt present, e.g. young stands (<50yrs). It is denoted by a slash which always precedes the estimated SI number. SI values are inventory Type Group and SI Estimated source code.
