4d SITE INDEX

All SI are shown to the nearest metre referenced at 50 years breast height age. SI is usually estimated for the dominant leading species. When an accurate SI cannot be obtained from age and height, estimated SI is shown after, or replaces the SI.

4e. ESTIMATED SITE INDEX

SI is estimated when suitable SI trees arenot present, e.g. Immature stands. The SI Source Code in the Inventory Label provides it. Associated fields in the data base are Inventory Type Group and SI Estimated source code.
