This map is created from information stored digitally in the BC Geographic Warehouse. The map has been structured to support the analytical functions of the Ministry of Forests, Lands, and Natural Resource Operations. The information contained in the Warehouse originates from a wide variety of data custodians. Administrative boundaries and the Ownership colour theme are for reference purposes only. 4d SITE INDEX
All SI are shown to the nearest metre referenced at 50 years breast height age. The SI is either estimated (ESTIMATED) or based on height, diameter or SI spot to be updated from age and height, estimated SI is shown after, or replaces the SI.

4e ESTIMATED SITE INDEX
SI is estimated when suitable SI trees aremnt present, e.g. non-forested polygons. The SI is estimated from known values and always provided it. Associated fields in the data base are Inventory Type Group and SI Estimated source code.
