4d SITE INDEX
All SI are shown to the nearest metre referenced at 50 years breast height age. SI can be derived from Table of Contents heading symbols. When an accurate SI cannot be obtained from age and height, estimated SI is shown after, or replaces the SI.

4e. ESTIMATED SITE INDEX
SI is estimated when suitable SI trees cannot present, e.g. non-commercial, deciduous, etc. SI is estimated from adjacent polygons SI Associated fields in the data base are Inventory Type Group and SI Estimated source code.
