4d SITE INDEX

All SI are shown to the nearest metre referenced at 50 years breast height age. SI is based on the species listed in Line 3. Site Index is estimated from the site class and site series or inventory age and height, estimated SI is shown after, or replaces the SI.

4e ESTIMATED SITE INDEX

SI is estimated when suitable SI trees cannot present, e.g. Inventory Type Group 1 and 2 stands. SI is shown after the SI and always replaces the SI. Estimated SI links to the site tables in Inventory Type Group and SI Estimated source code.
