4d SITE INDEX

All SI are shown to the nearest metre referenced at 50 years breast height age. Where an accurate SI cannot be determined (e.g. young species, mixed wood stands) SI cannot be obtained from age and height, estimated SI is shown after, or replaces the SI.

4e. ESTIMATED SITE INDEX

SI is estimated when suitable SI trees cannot present, e.g. young stands, mixed wood stands. The following table of codes provides 5 Associated fields in the data base are Inventory Type Group and SI Estimated source code.
