4d SITE INDEX

All SI are shown to the nearest metre referenced at 50 years except where noted. SI are estimated from a variety of sources, having low confidence. When an accurate SI cannot be obtained from age and height, estimated SI is shown after, or replaces the SI.

4e ESTIMATED SITE INDEX

SI is estimated when suitable SI trees aremsit present, e.g. immature stands. SI is shown after the SI. Site Index Curves are always provided it. Associated fields in the data base are Inventory Type Group and SI Estimated source code.
