4d SITE INDEX

All SI are shown to the nearest metre referenced at 50 years breast height age. SI is estimated for all species using the leading species. When an accurate SI cannot be found from age and height, estimated SI is shown after, or replace the SI.

4e. ESTIMATED SITE INDEX

SI is estimated when suitable SI trees arenot present, e.g. young stands. Source code 'P' indicates SI is from photo interp. 'L' indicates it is recorded twice in the data base as Inventory Type Group and SI Estimated source code.
