4d SITE INDEX
All SI are shown to the nearest metre referenced at 50 years breast height age. Where a SI is shown for a species that is not a leading species, 'Minor' is placed after SI (shown at breast height age and height) estimated SI is shown after, or replaces the SI.

4e. ESTIMATED SITE INDEX
SI is estimated when suitable SI trees are not present; e.g. Recently Logged, Non-Forest, Alpine. Refer to Site Index Adjustment procedure in Associated fields in the data base are Inventory Type Group and SI Estimated source code.
